

Goods and Services Policy

At **Grupo Piñero** we are well aware of the importance of buying locally in order to directly contribute to developing the communities where we operate and to make our company more sustainable. We have established the following commitments to achieve this:

- As far as possible buy **products** produced and/or grown locally and sustainably.
- Give priority to purchasing products, which minimise waste from packaging, encouraging as far as possible the purchase of bulk, or loose goods, which are produced sustainably.
- Consider and purchase **high-energy efficiency** products to reduce energy consumption.
- Establish mechanisms to **select suppliers** working with sustainable criteria in their production, packing and transport processes.
- Use products which meet **legal** sanitary and environmental standards.
