Dear Colleagues,

It is with pleasure that I present you for the first time with our Sustainability Report, based on our results in the economic, social and environmental dimensions over the past year.

However, before embarking on the environmental and social aspects, allow me to sketch out our economic performance in 2016.

Last year was, once again, characterised by prudent management, resulting in an EBITDA of 195 million euros, higher than our expectations, while our turnover likewise increased by 14%.

These solid results came about in parallel with the efforts we focus on sustainability, dating back to the approval in 2014 of a Corporate Social Responsibility Management System, which marked a turning point for our organisation. Following on from this, we drew up our “CSR Strategic Plan 2015-2018”: the route map for the coming years, through which we expect to achieve major results from both the social and environmental perspectives.

We have ever since been hard at work to extend sustainability to all our companies, incorporating criteria of sustainable and responsible management in their daily operations.

In 2016, we continued these efforts by drawing up an Annual Working Plan, in which we defined the objectives and actions to be undertaken over the course of last year within the context of our 2015-2018 strategy.

In social terms, we continued to make great efforts internally to improve the quality of life of our employees, enhancing their training day by day, and providing them with healthier working environments.

For example, I would like to emphasise the investment of more than 4 million euros in the improvement and adaptation of the staff areas at our hotels in the Caribbean. Meanwhile, our training plans increased the hours dedicated to awareness-raising about sustainability issues by 68% compared with 2015. We have likewise incorporated the “Healthy Company” programme, with a focus on our hotels on the Riviera Maya, involving more than 700 of our colleagues.

As for our social initiatives, in 2016 we dedicated more than €120,000 (19% more than in 2015) to various third-sector organisations in Spain and the Caribbean, focused above all on children and young people.

In the environmental sphere, we have maintained our commitment and developed initiatives that aim to reduce our carbon footprint, improve water management, and make an active contribution to biodiversity conservation around the world. During this year, we in fact defined our commitments in this area, and drew up action plans at 11 Bahia Principe Hotels & Resort establishments.

Specifically, in 2016 we managed to reduce the ratio of kilowatt-hours per guest by 6%, saving more than 12,000 MWh across all our hotels, and avoiding more than 5,000 tonnes of CO2 emissions. We likewise reduced the ratio of litres of water per guest by 3.5%, cutting consumption by 147,000 cubic metres, equivalent to the water used by 210,000 customers, while also successfully implementing an Integrated Waste Management plan, which has allowed us to improve the management of more than 1,400 tonnes of waste. Lastly, we achieved 15 certifications at 11 of our hotels in the Caribbean.

Following on from these and other tangible results, we cannot but congratulate ourselves on the distance covered in 2016, while redoubling our efforts in 2017, when we will be collaborating with the International Year of Sustainable Tourism.

All that remains is for me to offer my heartfelt thanks to all those whose dedication, hard work and effort are ensuring that sustainability has taken hold at our organisation, contributing to a dream that is also our mission: to be a leading company in the international tourism sector, making an active contribution to sustainable development.

Warmest regards,

Encarna Piñero
Executive Vice-President
